Python for Data Science Practical

Practical - I

Roll No. : S009	Name: Shubham Gawde
Class : SYIT	Batch : 1
Date of Assignment : 15 7 26	Date/Time of Submission : 15 7 26

1a. Write a python code to print your profile.

```
name = input("Enter your name: ")
age = input("Enter your age: ")
city = input("Enter your city: ")
standard = input("Enter your standard: ")
Rollno = input("Enter your Rollno: ")
print("\n--- My Profile ---")
print("Name:", name)
print("Age:", age)
print("City:", city)
print("standard:", standard)
print("Rollno:", Rollno)
```

```
/Python314/PDS.py
Enter your name: Shubham Gawde
Enter your age: 18
Enter your city: mumbai
Enter your standard: SYIT
Enter your Rollno: S009

--- My Profile ---
Name: Shubham Gawde
Age: 18
City: mumbai
standard: SYIT
Rollno: S009
```

1b. write a python code to print addition of two numbers.

```
num1 = float(input("Enter first number: "))
num2 = float(input("Enter second number: "))

result = num1 + num2

print("The sum of", num1, " ", num2, "is:", result)

print("S009")
```

```
Enter first number: 16
Enter second number: 2.5
The sum of 16.0 2.5 is: 18.5
S009
```

1c. Write a python code to print square root of number.

```
import math
num = float(input("Enter a number: "))
root = math.sqrt(num)
print("Square Root =", root)
print("S009")
```

```
Enter a number: 16
Square Root = 4.0
S009
```

1d. Write a python code to calculate area of Triangle.

```
b = float(input("Enter the base of the triangle: "))
h = float(input("Enter the height of the triangle: "))
area = 0.5 * b * h
print("The area of the triangle is:", area)
print("S009")
```

```
Enter the base of the triangle: 3
Enter the height of the triangle: 4
The area of the triangle is: 6.0
S009
```

1e. Write a python code to swap two variables.

```
a = input("Enter value for A: ")
b = input("Enter value for B: ")

print(f"\nBefore swapping:\nA = {a}\nB = {b}")

temp = a
a = b
b = temp

print(f"\nAfter swapping:\nA = {a}\nB = {b}")

print("S009")
```

```
Enter value for A: 123
Enter value for B: 456

Before swapping:
A = 123
B = 456

After swapping:
A = 456
B = 123
S009
```
