

S009 PDS Farmer

Farmer Profile

```
farmer_name = input("Enter farmer name: ")
farmer_age = input("Enter farmer age: ")
village = input("Enter village: ")
land_type = input("Enter type of crop/standard: ")
farmer_id = input("Enter farmer ID/Rollno: ")
```

```
print("\n--- Farmer Profile ---")
print("Name:", farmer_name)
print("Age:", farmer_age)
print("Village:", village)
print("Crop Type:", land_type)
print("Farmer ID:", farmer_id)
```

1. Add weights of two harvested crops

```
crop1_weight = float(input("Enter weight of first crop in kg: "))
crop2_weight = float(input("Enter weight of second crop in kg: "))
```

```
total_weight = crop1_weight + crop2_weight
print("Total weight of", crop1_weight, "kg and", crop2_weight, "kg is:", total_weight,
"kg")
```

2. Find square root of total harvested area

```
import math
total_area = float(input("Enter total harvested area in sq.m: "))
sqrt_area = math.sqrt(total_area)
print("Square Root of harvested area =", sqrt_area)
```

3. Calculate area of a triangular field

```
base = float(input("Enter the base of the triangular field in m: "))
height = float(input("Enter the height of the triangular field in m: "))
field_area = 0.5 * base * height
print("The area of the triangular field is:", field_area, "sq.m")
```

4. Swap quantities of two fertilizer bags

```
bagA = input("Enter quantity for Fertilizer Bag A in kg: ")
```

```
bagB = input("Enter quantity for Fertilizer Bag B in kg: ")
```

```
print(f"\nBefore swapping:\nBag A = {bagA} kg\nBag B = {bagB} kg")
```

```
temp = bagA
```

```
bagA = bagB
```

```
bagB = temp
```

```
print(f"\nAfter swapping:\nBag A = {bagA} kg\nBag B = {bagB} kg")
```

```
print("S009")
```

```
--- Farmer Profile ---
```

```
Name: Shubham
```

```
Age: 20
```

```
Village: Kudal
```

```
Crop Type: Basmati Rice
```

```
Farmer ID: S009
```

```
Enter weight of first crop in kg: 2
```

```
Enter weight of second crop in kg: 4
```

```
Total weight of 2.0 kg and 4.0 kg is: 6.0 kg
```

```
Enter total harvested area in sq.m: 16
```

```
Square Root of harvested area = 4.0
```

```
Enter the base of the triangular field in m: 100
```

```
Enter the height of the triangular field in m: 300
```

```
The area of the triangular field is: 15000.0 sq.m
```

```
Enter quantity for Fertilizer Bag A in kg: 8
```

```
Enter quantity for Fertilizer Bag B in kg: 6
```

```
Before swapping:
```

```
Bag A = 8 kg
```

```
Bag B = 6 kg
```

```
After swapping:
```

```
Bag A = 6 kg
```

```
Bag B = 8 kg
```

```
